PROFESSIONAL SUMMARY

Senior Business Analyst with **6+ years of experience in translating ambiguous business problems to scalable, outcome-driven solutions** using automation across varied platforms. Skilled in **Product Discovery, Stakeholder Management, Roadmap Prioritisation, Project Delivery and Cross-Functional Collaboration**. Currently transitioning into Product Management via the NextLeap PM Fellowship (2026).

WORK EXPERIENCE

WPP Media - Choreograph (A W.P.P. Company), Bengaluru

(Remote/OnSite)

Senior Business Analyst (Full Time)

(Mar 2024 - Present)

- Led discovery and delivery for 200+ automation requests across India, achieving a 90%+ stakeholder alignment rate through structured feasibility evaluation and documentation.
- Redesigned end-to-end project intake workflows, reducing average intake-to-handoff cycle time by 50% and directly improving engineering throughput.
- Owned sprint planning and capacity forecasting for a cross-functional team of 15+, improving resource utilisation by 30% using Wrike.
- Initiated process gap analysis that improved intake acceptance rate by 80% and reduced handoff delays via a redesigned operating framework.
- Drove 100% compliance on stakeholder approval signoffs for automation initiatives across internal and external collaborators; currently leading group-wide strategic transformation.

Annalect India (Omnicom Group), Bengaluru

(Remote/OnSite)

Business Analyst (Full Time)

(Apr 2022 - Mar 2024)

- Conceptualised, scoped, and managed automation projects delivering \$5.8M in cost savings and eliminating 176,000+ manual work hours annually; led Jira migration, boosting operational efficiency by 20%.
- Built QA process from scratch, cutting product defects by 70% and enabling bug-free releases worth \$0.8M; introduced RTM to accelerate defect resolution and ensure end-to-end requirement coverage.
- Delivered UI/UX recommendations across 3 major product releases (\$0.5M combined value), improving usability and end-user adoption.
- Partnered with data teams to develop Power BI dashboards, improving data accuracy by 75%; integrated LLM-based automation into BA workflows to accelerate research and decision quality.
- Standardised project workflows by 20% and mentored 5+ new analysts, significantly reducing team ramp-up time.

Servetel Communications Pvt. Ltd, Gurugram

(Remote/OnSite)

Sales Analyst (Full Time)

(Jan 2020 - Apr 2022)

- Automated manual reporting workflows, reducing task duration from 20 minutes to under 2 minutes per cycle.
- Reallocated \$295K in marketing spend through 100% data accuracy monitoring; forecasted FY22-23 data that enabled 230% sales growth in 6 months.
- Trained 5 batches (26 members) on product, pricing, and process; enhanced campaign quality by 30% through competitor analysis.

PROJECTS & CASE STUDIES

- Swish 10-Min Delivery Reliability Optimization ([Link](#))**

Led a product initiative to address Swish's 10-minute delivery reliability gap by identifying failures across kitchen operations, delivery assignment, and customer support. Designed a structured solution spanning a problem brief, phased roadmap, detailed PRDs, and interactive prototypes focused on improving SLA adherence, operational transparency, and service recovery.

Skills Used: Product Thinking, Problem Structuring, PRD Writing, Roadmapping, UX Thinking, Prioritization, Strategic Planning

Key Technologies: Cursor, Google Antigravity, Google Stitch, Whimsical

- AI-Powered Restaurant Recommendation Engine (Bengaluru-Scoped) ([Link](#))**

Built and shipped an AI-driven tool delivering personalized restaurant recommendations to reduce decision fatigue, currently focused on Bengaluru for higher data accuracy. Designed and deployed the end-to-end system using LLM-based reasoning and AI-assisted development tools.

Skills Used: Product Thinking, AI Product Development, Prompt Engineering, System Design, Full-Stack Deployment

Key Technologies: Cursor, Google Antigravity, Google Stitch, Supabase, Groq, Render, Vercel, Hugging Face Datasets

- Professional Portfolio Website ([Link](#))**
 Designed and shipped a scroll-driven professional portfolio featuring a cinematic hero animation creating a smooth, film-like experience as users scroll. Independently handled everything from visual concept and AI-generated assets to deployment and performance tuning on a live production environment.
Skills Used: Performance Optimization, AI-assisted Development, Prompt Engineering, Web Deployment, Debugging & Iteration
Key Technologies: Google Antigravity, Google Whisk, Next.js, Framer Motion, Vercel, WebP Image Sequencing, HTML5 Canvas
- Support Optimization Case Study ([Link](#))**
 Drove a product strategy to reduce customer support ticket volume by identifying impacting metrics and modeling support demand at scale. Defined dependencies to lower agent headcount and unlock operational cost savings.
Skills Used: Product Discovery, Guesstimation, Problem Structuring, KPI Mapping, Data Analysis, Business Strategy
Key Technologies: Whimsical, KPI Trees
- Growth Segmentation Case Study ([Link](#))**
 Designed a segmentation-driven growth strategy to identify high-LTV user cohorts and address retention drop-offs. Mapped acquisition, behavioral, and product data to actionable product and growth experiments.
Skills Used: User Segmentation, Growth Strategy, Retention Analysis, Experiment Design
Key Technologies: Excel, Cohort Analysis, A/B Testing Frameworks
- Increasing Usage of ChatGPT's Conversational Feature - PRD ([Link](#))**
 Led a product initiative to improve adoption of ChatGPT's voice feature by addressing discoverability and onboarding gaps. Designed in-product nudges and guided onboarding to drive activation and repeat usage.
Skills Used: Product Strategy, Funnel Analysis, UX Thinking, RICE Prioritization, Experimentation
Key Technologies: Product Analytics, A/B Testing, UX Flows, Wireframing (Whimsical)
