PROFESSIONAL SUMMARY

Product Manager with 6+ years of experience taking AI automation products and platforms from 0-to-1 starting from discovery and roadmapping through to delivery and KPI ownership. Shipped internal products generating ~INR 10 Cr+ in measurable impact, maintaining 88% CSAT and 90% retention. Looking to bring fast execution and intuition to a high-growth product and operation environments.

WORK EXPERIENCE

WPP Media, Senior Business Analyst (Product Operations) | Bengaluru, India

Mar 2024 - Present

- Supervised product discovery for 250+ internal automation initiatives using voice-of-the-customer signals and data-driven prioritizations (30% FTE, 33,000+ hours & ~INR 10 Cr+ savings as well as quarterly KPIs) with 88%+ stakeholder alignment.
- Spearheaded the revamp of the automation request pipeline by integrating LLM-generated BRDs/SOWs, auto discovery-calls setup, auto-status (in Wrike) updates and reducing intake-to-handoff time by 70%, achieving 100% acceptance across the organization.
- Tracked success KPIs across multiple delivered products, overall achieving 80% adoption, 90% retention, 8-10% churn, 88% CSAT, while simultaneously monitoring active users (DAU), usage rates, time spent, task completions, issues raised per product, etc.
- Owned Agile sprint planning and capacity forecasting for a team of 18, improving utilization by 30% using Wrike planning.

Annalect India (Omnicom Group), Business Analyst - Intelligent Automation | Bengaluru, India

Apr 2022 - Mar 2024

- Managed product strategy and execution of multiple AI-enabled automations saving ~INR 50 Cr+ and 176,000+ hours overall.
- Directed manual tracking to Jira migration, boosting operational and delivery efficiency by 40% compared to earlier.
- Introduced RTM & quality-first frameworks leading to 70% fewer defects and enabling bug-free releases of products worth ~INR 7 Cr+.
- Suggested UI/UX modifications across 3 major products (worth ~INR 4 Cr+), improving usability and end-user adoption and CSAT.

Servetel Communications, Sales Analyst | Gurugram, India

Jan 2020 - Apr 2022

- Recommended ~INR 2 Cr+ marketing spend reallocation using user behavior, campaign performance and industry trend data.
- Forecasted FY22-23 market direction via market and competitor research that enabled 230% sales growth in 6 months.

PROJECTS

Groww Review Analyzer AI Agent | [Link](#) | Cursor, Google Stitch, MCP (Gmail, Google Docs), Groq LLM API, GitHub Actions

- Built an AI agent for Groww leadership that pulls weekly App Store and Play Store user reviews; scalable to other apps.
- Set up a weekly auto-trigger that pulls previous week reviews and merges it with a rolling 3-month corpus that synthesizes overall sentiments, real problems and action items using LLMs, then generates a Google Doc and Gmail draft ready to share with leadership.

RAG Chatbot, Mutual Fund Factual Response | [Link](#) | Cursor, bge-small-en, ChromaDB, Groq LLM API, Google Stitch, GitHub Actions

- Built an LLM-powered mutual fund Q&A chatbot using Groww fund data, replacing fragmented information sources.
- Automated the pipeline for scraping, parsing, embeddings, and vector DB storage, enabling citation-backed Groq LLM responses.

Swish Delivery Trust & Reliability Research | [Link](#) | Whimsical, Product Roadmap, PRD, RICE, User Research, Competitor Research

- Researched & structured four recurring failure themes at Swish. Late deliveries (>10 mins), frequently unserviceable due to unknown surge, missing rider assignment even after food is ready, and inadequate support quality were the main findings.
- Delivered a full 6-part series on LinkedIn: Problem & opportunity Brief (scale cost/opportunity), Product roadmap, PRDs and wireframes by mapping user personas, conducting user research and finding trust-break patterns.

Meta Campaign Activation (at WPP Media) | Product Discovery & Roadmapping, Prioritization, Stakeholder Management, Whimsical

- Fully automated Meta campaign activation for India's internal implementation team where manual-entry errors had previously caused major financial losses. This was done by scoping out zero manual touchpoints in the setup flow.
- Navigated high ambiguity via a 4-phase product roadmap by shipping the initial 2 phases on deadline to prove impact, then aligned cross-functional teams through Phases 3 and 4 with data-driven prioritization.
- Drove impact of 35% FTE savings, 0 setup errors, 100% adoption, 86% CSAT and ~INR 1.5 Cr+ in department savings.

SKILLS

- **Product Management:** Product Discovery, Product Strategy, Product Roadmap, PRD, Cross-Functional Leadership, Stakeholder Management, Agile/Scrum, GTM, Voice of the Customer
- **Product Analytics & Growth:** KPI Ownership, A/B Testing, Funnel Optimization, Retention, Churn, CSAT
- **AI & Automation:** LLM Integration, RAG, Agentic AI, MCP Integrations, Process Automation
- **Data & Build:** Power BI, Cursor, Google Antigravity, Render, Vercel, Google Stitch, SQL, Figma, Miro, Whimsical, Jira, Wrike

EDUCATION

University of Petroleum & Energy Studies, Dehradun, B.Tech, Petroleum Engineering

Jul 2016 - Jul 2020
