EXPERIENCE

Intuit, Software Engineer 2 | Bangalore, India

Mar 2025 - Present

- Led design of the OAuth 2.0 SSO integration between QuickBooks Online and Amazon, partnering with product and security teams to architect token management microservices serving 500K+ MAU across four Intuit products.
- Architected federation orchestration APIs with Redis caching and async token validation, delivering 99.95% availability and sub-200ms p99 latency at peak load.
- Drove the BYOI enterprise SSO initiative for Google and Okta, implementing SAML/OIDC protocol handlers with circuit breaker patterns; reduced p90 login latency by 40% and auth failures by 30%.
- Managed zero-downtime releases via blue-green deployments; instrumented request tracing and structured logging, cutting mean time to detect issues by 35% and accelerating partner onboarding by 25%.
- Implemented the session management layer for token lifecycle, handling concurrent invalidation and refresh across services; lowered redundant upstream auth calls by 60%.
- Built an LLM-powered incident triage assistant using RAG over historical auth failure logs and runbooks, enabling on-call engineers to resolve identity platform issues 40% faster and reducing manual log analysis effort.

Microsoft, Software Engineer | Hyderabad, India

Jul 2022 - Feb 2025

- Engineered high-throughput services for the Azure Backup platform using C# and .NET Core on Azure Service Fabric, processing 10M+ daily backup operations with sub-100ms latency across multi-tenant architectures.
- Directed rollout of Crash-Consistent Multi-Disk Backup across 100+ Linux distributions, coordinating with 3 partner teams on snapshot coordination and I/O scheduling; decreased data integrity issues by 20% and saved 500+ support hours monthly.
- Developed secure data pipelines for Confidential VMs with end-to-end encryption and RBAC via Azure Key Vault, onboarding 50+ enterprise customers with strict data isolation requirements.
- Refactored core REST APIs and overhauled CI/CD workflows, redesigning service contracts to achieve 90%+ test coverage and lowering MTTR by 30%.
- Developed an event-driven auto-healing service using Azure Functions and message queues, recovering 95% of transient failures via dead-letter queue processing; saved \$250K annually — won Microsoft Hackathon.
- Optimized backup metadata queries by profiling SQL bottlenecks and implementing connection pooling, improving job completion rates by 15% under peak load.

Microsoft, Software Engineering Intern | Hyderabad, India

Jan 2022 - Jun 2022

- Implemented server-side pipelines for backup and restore of Write-Accelerated Disks, optimizing disk snapshot coordination and improving data transfer throughput by 15% for Azure Backup.
- Created a serverless test execution framework using Azure Functions and Python with queue-based task distribution, parallelizing test runs and shortening cycle time by 40%.
- Devised an error-mapping and classification system using pattern matching on job telemetry, correlating failure signatures to root causes and cutting triage time by 50%.

SKILLS

Languages	Java, Golang, C/C++, C#, Kotlin, JavaScript/TypeScript, Python, SQL, Bash
Frameworks	Spring Boot, Spring Cloud, Hibernate, .NET Core, gRPC, FastAPI, Node.js, Express, Protocol Buffers
Architecture	Microservices, Distributed Systems, Event-Driven Architecture, System Design, REST, Pub/Sub, Circuit Breaker, Load Balancing, Sharding, API Gateway, CQRS
GenAI	LLM, RAG, Prompt Engineering, Context Engineering, MCP, AI Agents, LangChain, Vector Databases, Embeddings, Fine-tuning
Data & Messaging	PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Elasticsearch, Apache Kafka, RabbitMQ, BigQuery
DevOps	AWS, Azure, GCP, Docker, Kubernetes, Terraform, Helm, CI/CD (Jenkins/GitHub Actions)
Observability	Prometheus, Grafana, Splunk, OpenTelemetry, ELK Stack, Datadog, Jaeger
Testing	JUnit, Mockito, pytest, Integration Testing, Load Testing, TDD, Contract Testing

ACHIEVEMENTS

Microsoft Awards	Customer excellence Award 2023, Culture Award 2024, Microsoft Hackathon 2024
ACM ICPC	Ranked 133 in ACM ICPC Online Qualifiers 2019 and 242 in ACM ICPC Regionals 2020.
Google Kickstart	Global ranks: 57 (2020 Round H), 156 (2021 Round F) among thousands worldwide.
Codechef	5-star (2062) rating, top 0.5% globally, best ranks: 51, 175, 172, 139 among 20,000+ participants.
Hack the Interview	Rank 270 among 4,500 participants in Hack the Interview Asia Pacific 2020.
Programming Championship	Rank 22 among 15,000 participants in the World Programming Championship, IIT Bombay 2020.

EDUCATION

Birla Institute of Technology Ranchi, B.Tech CSE GPA: 8.60

July 2018 - July 2022
